AQA COMPANY

About

Use the **Nonconforming Product** module to initiate, process and track your nonconforming product reports. You can also generate a **PDF report** for a particular item, and a **PDF printout** of all NC reports as they appear in the list (read more about reports in tutorial [Navigation And Common Features - Reports](#)).

To **sort** the list, click on the column header.

Use the **sidebar menu** to add, edit, or delete a NC report record.

Read more about the sidebar menu in tutorial [Navigation And Common Features - General Navigation](#).

NOTE: Do not use this module for nonconforming product purchased from a vendor, supplier or subcontractor. **Nonconforming purchased products** are recorded in the [Supplier Control](#) module

Use the **Setups** menu to set up NC product **categories** and **dispositions**.

Status: Closed By: Date: 7/13/2008

Corrective Action

Select existing Corrective Action Request (CAR) or generate new.

CAR Number:

Open and complete the new action in the 'Corrective Action' module.

Attachments

This is a portion of the NC Product form

Where appropriate, **create a corrective action request (CAR)** to identify and correct the underlying causes of the nonconformity.

If you already initiated a corrective action, just **reference the CAR number** by selecting it from the drop-down list. Or, you can **automatically generate** a new CAR by clicking the **Generate New CAR** button.

After you generate a new CAR, go to the **Corrective Action** module and complete and/or edit the CAR, to include due date, category, and other pieces of information that may still be missing.
