About

Use this **Measuring Equipment** module to register, and track the calibration status of measuring equipment in your company. To satisfy ISO 9901 you only need to include equipment used for product and/or process verification.

You can also generate a **PDF report** for a particular piece of equipment and a **PDF printout** of all equipment as they appear in the table (read more about reports in tutorial [Navigation And Common Features - Reports](#)).

To **sort** the table, click on the column header.

Use the **sidebar menu** to add, edit, or delete a measuring equipment record.

Read more about the sidebar menu in tutorial [Navigation And Common Features - General Navigation](#).

Use the **Setups** menu to setup types of measuring equipment and locations where the equipment are used or stored.

**End of Slide Show. Thank You for Watching**
